

Activity: Think-Pair-Share

Answer the following questions on your own. Share your thoughts with a partner, and then we will share with the entire group.

1. What are your reservations about technology in education?
2. What role does technology have in education?
3. How comfortable are you with technology?
4. What successful examples of technology integration have you participated in or witnessed?
5. Under what conditions is technology valuable?
6. What kinds of technology resources are used in your school and how well do they help students meet learning objectives?
7. What role does the teacher play before, during and after the use of the technology?
