March Seasonal Harvest: POTATOES & YOGURT

Potatoes are also a significant source of VITAMIN C and the minerals POTASSIUM and COPPER. Vitamin C is an antioxidant vitamin that is needed to form collagen for skin, healthy teeth, gums and blood vessels. Potassium is important for maintaining fluid balance, nerve impulses, and cardiac and muscle function. Copper is needed to make a protein in red blood cells called hemoglobin, maintenance of blood vessels and to metabolize iron.

Popular varieties of potatoes:
Russet, white, red, purple, yellow, new, fingerling, and sweet.

Upstate Farms All Natural Vanilla Yogurt served daily in your school. Other flavors also available—blueberry, strawberry and a variety of flavors available in 4 oz. cups.
