Greater Southern Tier BOCES
Career & Technical Education Program

Greater Southern Tier BOCES
Career & Technical Education Program
Why Is Unique Career Placement Important?

It gives students an opportunity to:

- Participate in individualized training at a worksite.
- Explore a career choice in a realistic setting.
- Meet people employed in their chosen career field.
- Develop positive work attitudes and responsibilities.
- Contribute to the development of the future workforce.
- Explore local employment opportunities.
- Foster cooperation between business and education.
- Obtain recommendations for future employment.

Enrollment Process

- The student completes an application and discusses career plans with a home school counselor.
- The counselor completes a recommendation form.
- The program coordinator reviews the application and recommendation, and interviews the student.
- Once the student has been accepted into the program, it is the home school’s responsibility to complete the enrollment process.
- To be accepted into the program, students must be in good academic standing at their home schools and demonstrate their ability to function as independent young adults at the worksite.

Scheduling

The Unique Career Placement Program is delivered through flexible time blocks either in the morning or the afternoon, and can be designed for one semester or a full year.

Each day the student will spend two hours with the employer/mentor at the worksite. Once every two weeks, the student will spend the two-hour session receiving classroom instruction which includes job preparation and workplace skill development.

For More Information

Contact Work Experience Coordinator Carolyn Connelly at (607) 739-3581 ext. 1234.
**Program Overview**

The Unique Career Placement Program is an exciting option for high school seniors. It provides opportunities for students to explore career options not offered at the home school or at the CTE Program. This long-term, half-day program enables students to learn via an integrated model that includes:

- Individualized training at a workplace.
- Instruction in career planning.

Students are placed in customized work settings with a selected supervisor. Each student will have an individualized training plan that outlines program objectives, job-specific outcomes, and skills necessary for entry-level employment.

- Students are not paid for this experience.
- Students can earn up to three credits for successful completion of the program.
- Students must provide their own transportation to and from their career placement sites.
- Students who excel in this program may be selected for membership into the National Technical Honor Society.

**Why Is Unique Career Placement Important?**
